“

“We’re always looking to partner with vendors who help us take it to the next level”

A wireless carrier executive’s answer when asked why his company chooses to work regularly with FSG.

YOU HAVE CHALLENGES, WE HAVE SOLUTIONS

When you’re looking for a Small Cell Construction Contractor for your small cell deployment, you need to know that the contractor you choose understands your needs.

At FSG Wireless, we understand every phase of a Small Cell Deployment project, but more importantly, we understand how to make sure you’re able to take your project to the next level.

**OVER IT,
AROUND IT,
OR THROUGH IT**

FSG Wireless offers telecom contractors and wireless carriers a complete small cell deployment management program. Everything from site acquisition, design and permitting, to procurement and installation, to post project monitoring, maintenance and warranty administration are offered by FSG’s experienced team of wireless infrastructure specialists.

The result is that you spend less time worrying about small cell deployments and more time focused on other opportunities!

Whatever your biggest challenge is on your next small cell deployment, FSG is committed to helping you find the solution that helps you achieve success for your project and for your customer!

THE TOOLS TO DO THE JOB

No two small cell deployments are the same. The best small cell construction contractors understand this and make sure they have the tools in their back pocket to take on any challenge.

FSG has been in the electrical construction business for more than 35 years and brings that experience, financial strength, and commitment to every small cell deployment we take on.

✓ ***The Right Team***

✓ ***The Right Fleet & Equipment***

✓ ***The Right Tools & Training***

✓ ***The Ability to Scale it All!***

THE FSG DIFFERENCE

FSG's Wireless Support Team combines the power of FSG's more than 35 years of industry leadership with custom small cell deployment program design and implementation to help you successfully reach your small cell deployment goals.

1 SITE ACQUISITION, DESIGN & PERMITTING

As a full-scale electrical construction contractor, FSG has taken its experience in design and permitting and brought it to telecom contractors and carriers for small cell construction projects.

3 SITE PREPARATION & INSTALLATION

FSG can take care of everything from excavating and boring, to power and fiber runs, to final power up and testing.

2 PROCUREMENT & PACKAGING

You need a small cell construction contractor that can not only get the right materials for the job, but also warehouse those materials and package them correctly to minimize install time and mistakes at the job site.

4 MONITORING, MAINTENANCE & WARRANTY

The best contractors stick around. We're available to maintain your solution and warranty our work so you get the support you need, when you need it.

A PARTNER AS STRONG AS YOU ARE

For More than 35 years, FSG has helped businesses large and small get the lighting, electrical, technology, and signage services they need.

In 2018 FSG:

*Employed more than 2200 people,
Reported revenues of more than 650 million,
Operated 30 offices in 18 states,
And maintained a contractor score of 2500+*
