Electrical Contractor

FSG

LIGHTING RETROFIT CASE STUDY

Challenge

FSG provided turnkey installation support for Publix Super Markets at 20 different locations in Georgia. Work could only be performed in off hours when the stores were closed, with all work cleaned and cleared so the store could open as scheduled each morning.

Solution

FSG completed the 20 stores in 10 weeks time with no interruption to Publix business or customers. Enhanced controls were also included in the installation, including lighting panels with Bluetooth capability. Over 3000 LED Highbay fixtures were installed in this GA Rollout.
