

# Experience You Expect in a Partner

## Port Authority of New York and New Jersey

FSG has been working with the PANYNJ for years and has completed multiple large projects. Completed projects include the Lincoln Tunnel, George Washington Bridge, Newark Airport and the Port Authority Bus Terminal. Currently there are more projects in the pipeline that the Port Authority will be completing with FSG. Over 12,000 fixtures are planned to be retrofit.

## Township of East Brunswick

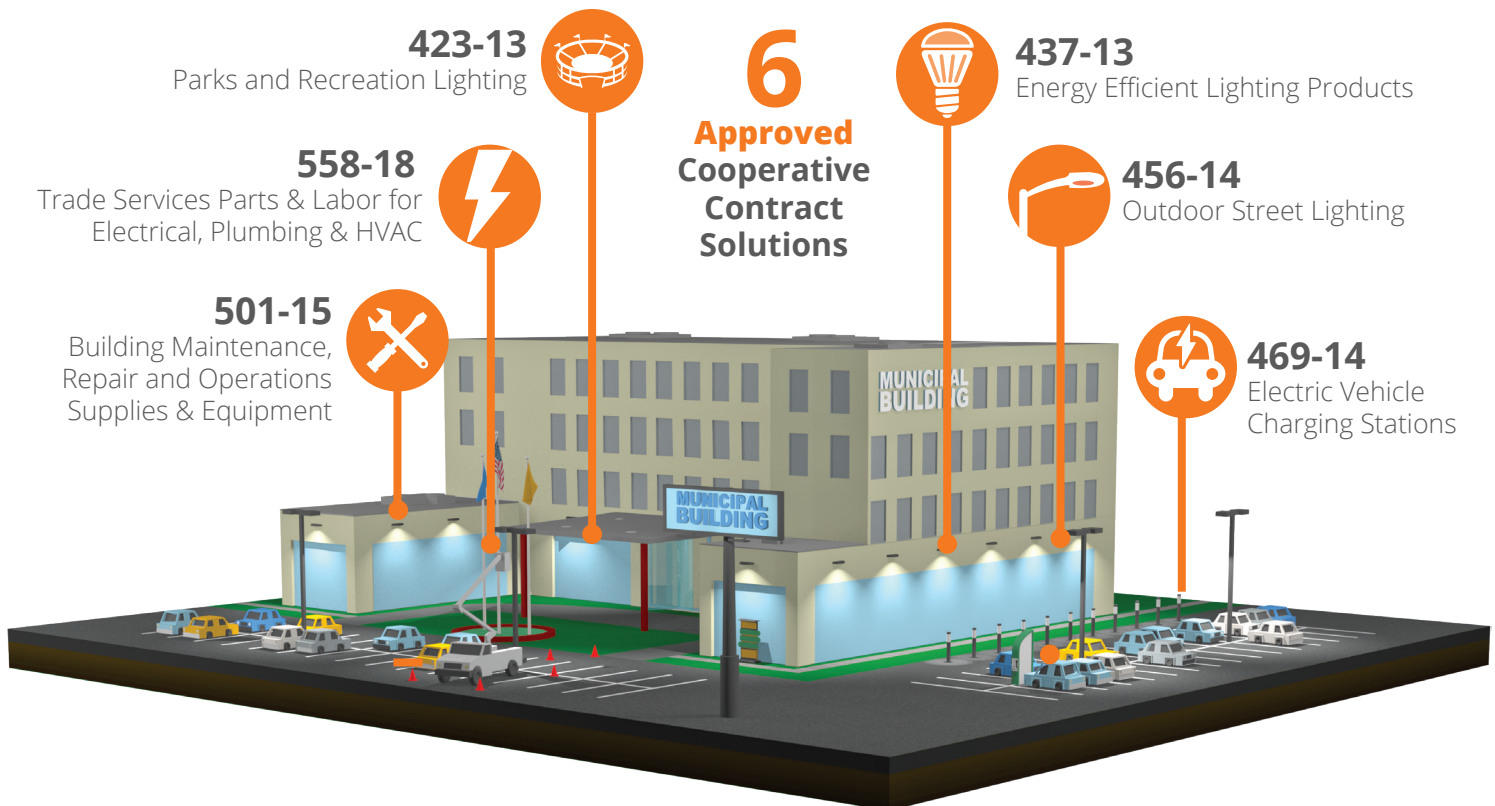

The Township of East Brunswick has completed several lighting upgrades with FSG. These projects include sports fields, parks, a parking garage, the pumping stations, and municipal buildings. The town has given FSG several more properties to audit and install. FSG's history of working with municipalities across the nation has helped the township cite FSG as it's clear energy partner.

## Freehold Regional High School District

The district is a group of 6 high schools in western Monmouth County, New Jersey. FSG was awarded a contract to upgrade existing fluorescent and HID lighting to LED. The entire project included retrofitting over 11,000 fixtures across the district. In addition, over 600 dual-technology occupancy sensors were installed in classrooms adding to the energy savings for the project.

## The Expertise of FSG + The Power of BuyBoard

Let FSG's wide range of expertise and the purchasing power of our national cooperative contract solutions help simplify the lighting and electrical service procurement process for you and your team. With **five approved contracts**, FSG can help bring light to your project. Whether it's LED lighting upgrades to public spaces, or school buildings want to capitalize on the latest incentives and boost community value for residents, **FSG is ready and capable.**
