

# TRAFFIC CONTROL PLANNING, PROJECT MANAGEMENT, & DEPLOYMENT

TRAFFIC CONTROL DESIGNED TO KEEP YOUR PROJECT MOVING

## Competitive Pricing

Careful design & planning combined with reliable equipment & team members make it easy for FSG Traffic Control to stay competitive on budget while delivering a quality product.

## On Time Every time

The best projects are the ones that finish on time. But to finish on time- you have to start on time. FSG Traffic Control will be where we say we will be, when we say we will be there- day or night!

## Responsive & Agile

In the world of construction, the unexpected should always be expected. FSG Traffic Control is able to respond quickly to projects- even when they come up at the last minute.

## Flexible & Motivated

Sometimes a project goes slower than planned. Sometimes projects go faster than planned! Either way, FSG Traffic Control is able to be flexible and is motivated to see everyone involved in the project win.

## WE CAN BE WHERE YOU NEED US TO BE

FSG Traffic Control is located in Austin, Texas. Our rapid deployment teams allow us to mobilize quickly and are proud to serve the I-35 Corridor from San Marcos to Round Rock- and beyond. And even if your project isn't in the Austin area- we'd still love to hear from you and see if we can help you out! After all, FSG Traffic Control is backed by FSG, a nationwide company committed to helping facility operators and contractors get the products and services they need to do the job right!

# SERVICES

## Planning & Design

FSG Traffic Control takes the whole project into consideration when developing a plan. FSG is then able to take care of all documentation, permitting, and coordination with other agencies to ensure the traffic control portion of the project goes smoothly.

## Traffic Lane Closures

From a low traffic residential street, to the main lanes of I-35, FSG Traffic Control is able to tackle any traffic control challenge safely and effectively to keep your people and job site safe.

## Bike Lane Closures

Bike lane closures can pose a unique challenge and danger to both workers and bicyclists. FSG Traffic Control deploys industry best practices designed to keep everyone safe, while still keeping the roads bike friendly.

## Sidewalk Closures

FSG Traffic Control can even help manage sidewalk closures so pedestrians don't find themselves in a dangerous situation. FSG Traffic Control can work with cities and businesses alike to make sure laws are followed and access to businesses affected by closures is impacted as little as possible.

## Intersection Closures

Intersection closures, perhaps the most common of traffic control scenarios, can also pose the greatest risk to people and property if not executed properly. FSG Traffic Control takes intersection closures extremely seriously and works to get them right so projects are a success.

## Detours

Drivers tend to get frustrated with detours. However, if they are planned well, marked correctly, and executed professionally, detours can be deployed as a traffic control device with great success. FSG Traffic Control makes sure detours are handled the right way, so projects and communities aren't impacted negatively by them.
